

Amendments to the Specification:

Please add the following new paragraph between paragraphs 14 and 15:

B1 -- FIG. 1A is a perspective view of an illustrative cable basket for use with the cable support apparatus;--

Please add the following new paragraphs between paragraphs 19 and 20:

B2 -- Referring now to FIG. 1A, cable basket 14 includes first and second elongated stringer elements 20 and 22, respectively. A channel section is suspended from stringers 20 and 22 so as to form a portion of a passageway for supporting cable runs thereon. In the illustrated embodiment, the channel section is formed of an open ended wire stock basket having longitudinal sections 26 attached to transverse sections 24. Transverse sections 24 include riser portions or legs 28 which are attached to the underside of stringers 20 and 22. The various elements of cable basket 14 are preferably joined by suitable known techniques, such as by welding.

Although the illustrated channel sections are formed of wire stock material, it is within the scope of the present disclosure to use other materials as well. For example, the channel section may be formed of solid or woven fabrications of various metals or any other material suitable for supporting cable runs thereon.--
